FIG. 8A

Figure 1 is a line graph showing the relationship between the normalized frequency H_{\perp}^{-} (y-axis) and the normalized voltage V_{BL} (x-axis) for three different modes: 212, 214, and 216. The y-axis ranges from 2 to 5, and the x-axis ranges from 2 to 7. The 216 mode (squares) starts at approximately (4.5, 4.5) and decreases to (6.5, 2.5). The 214 mode (triangles) starts at approximately (4.5, 4.2) and decreases to (6.5, 2.5). The 212 mode (circles) starts at approximately (4.5, 3.9) and decreases to (6.5, 2.5). All three modes converge to a value of approximately 2.5 at $V_{BL} \approx 6.5$.
